About AGPNT

Since 2005, AGPNT-Audiovisual has been dedicated to producing high-quality videos and photographs, serving clients across Brazil and internationally. The company specializes in projects for corporate, industrial, offshore, journalistic, and advertising sectors. Its team members are certified to adhere to strict safety protocols, allowing them to work effectively in industrial and offshore environments. AGPNT captures the essence of business by highlighting the beauty of everyday company life and its employees. The agency works in various settings, including industrial environments, infrastructure projects, architecture, and civil construction, creating content suitable for both internal and external publications, as well as for corporate social media and marketing initiatives. The agency's offerings include aerial photography, professional portraits, live streaming, and immersive 360° images, all designed to achieve a high visual impact. AGPNT also produces documentaries and corporate films, managing each step of the process from scriptwriting to final editing, ensuring that the content aligns with the client's brand identity. For professional portraits, the agency sets up a comprehensive technical infrastructure at the client's location to capture authentic images that convey reliability and professionalism without disrupting executives' routines. During events and lectures, in addition to capturing journalistic images and recording content for dissemination, the agency handles live broadcasting and real-time streaming. Moreover, Fotobrinde offers custom instant printing services, adding promotional value to events and enhancing the overall experience.

About our work

Corporate & industrial

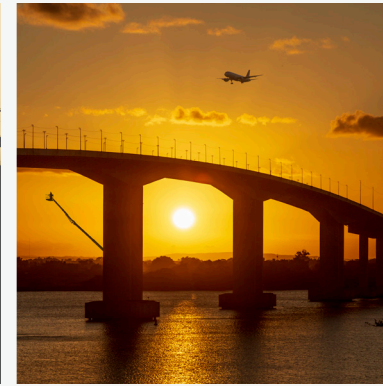

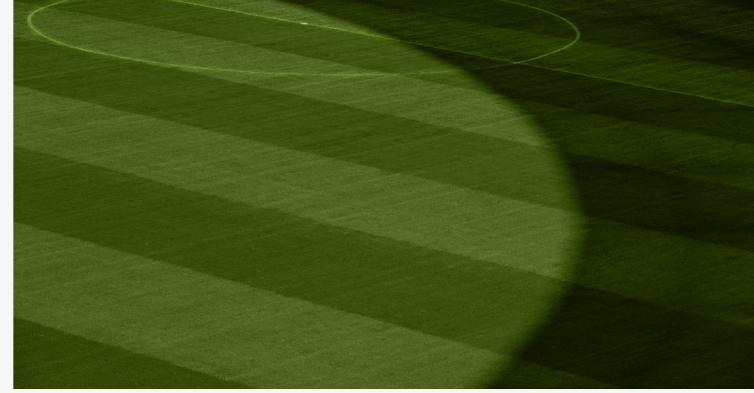

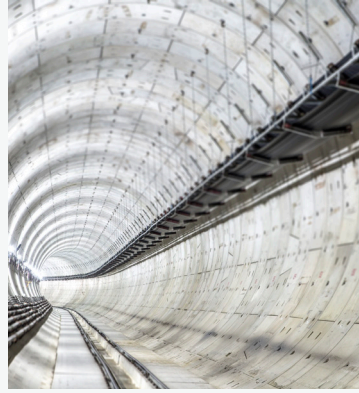

As image specialists in the industrial sector, we bring significant relevance to your project by enhancing your company's visibility in technical publications and creating opportunities to attract new investors and clients. Through our lenses, we capture and highlight the corporate environment, employee routines, essential equipment, and the importance of large structures or intricate details of your project. Our high-quality videos and photographs are designed for both internal and external publications, helping to strengthen your company's profile with your audience. AGPNT collaborates closely with your communication teams to fully understand and address your needs, while also exploring innovative solutions and developing new ideas. Beyond fulfilling requests, we leverage our industry expertise to enhance outcomes, ensuring that each image not only represents your brand but also effectively conveys its essence and values. With our collaborative approach, we aim not just to meet expectations but to exceed them, fostering a stronger connection between your company, our services, and your target audience.

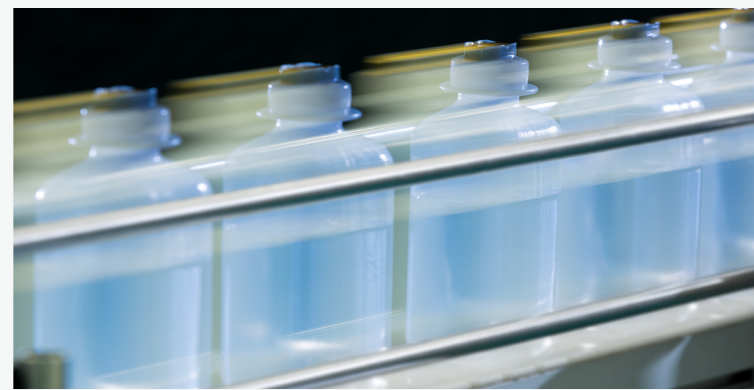

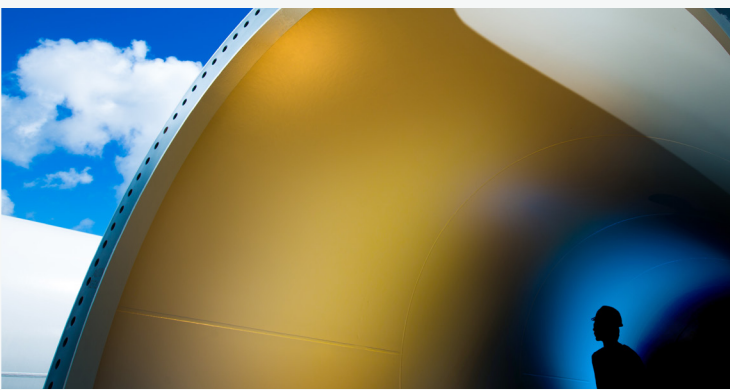

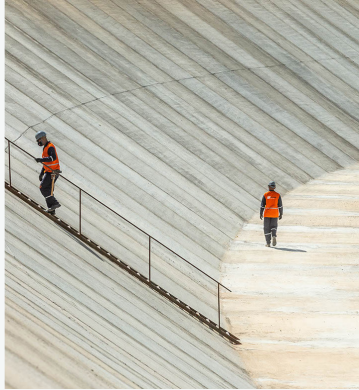

Infrastructure & architecture

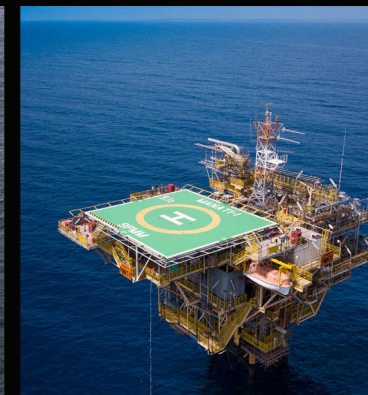

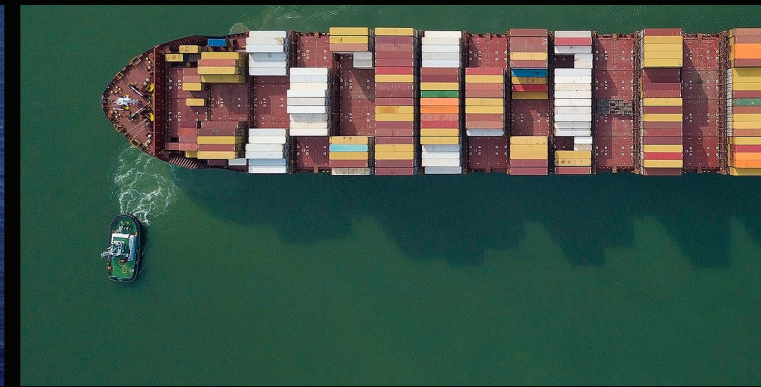

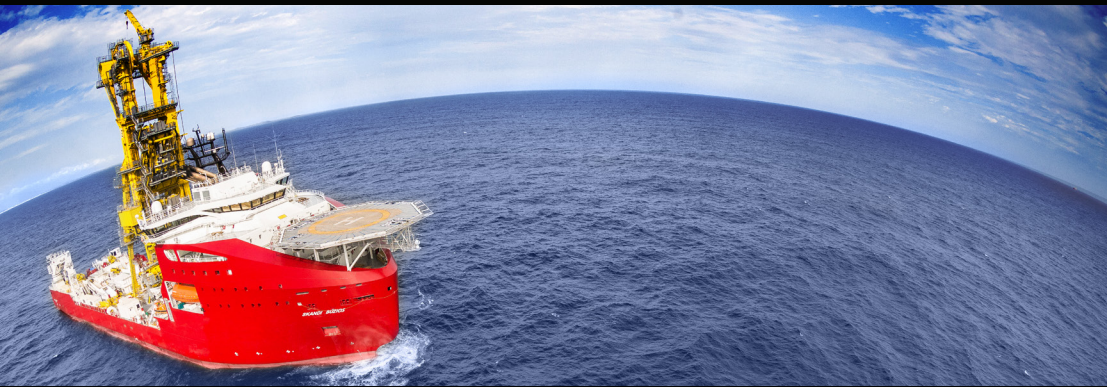

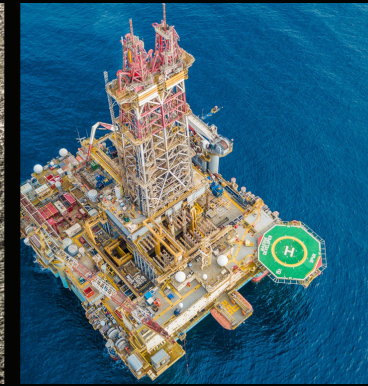

Our professional images, both photos and videos, span several areas, with a particular emphasis on architecture, corporate environments, and urban infrastructure projects. We focus on ensuring that our images serve a practical purpose while highlighting the value of the projects and their deliverables. Professionals and companies in architecture, infrastructure, and civil construction can greatly benefit from our services to document their assets and projects, effectively conveying their achievements to the market in a superior and professional manner. Throughout project development, we create images that facilitate comprehensive visual analysis, which is essential for project catalogs and preliminary assessments. We employ various photographic techniques, including conventional photography, time-lapse, immersive 360° images and aerial photography, to provide a thorough and detailed perspective. This allows us to support our clients in addressing challenges that often arise in architectural, infrastructure, or construction projects, ensuring that each step is effectively recorded and that the images cater to the specific needs of each client.

Aerial photos & videos

Whether from land or air, our goal at AGPNT is to exceed your expectations. Leveraging our expertise, we produce stunning photographs, films and 360° images using helicopters or drones, delivering visual quality that resonates with all audiences. Our agency provides effective solutions tailored to your needs, including technical inspections and diverse perspectives of offshore or remote environments, all while maintaining high-quality standards at reduced costs. With a combination of technical skill and artistic vision, we ensure that your projects are showcased in a distinctive manner, emphasizing their market relevance and attracting the attention necessary for success.

Event Photography

Our infrastructure enables us to handle events of all types and sizes, no matter where they occur. From lectures and presentations to parties, fairs, and various marketing activities, we provide comprehensive coverage, delivering images and videos in real-time. These can be promptly sent to the client's press office or shared on their social media channels. This partnership ensures greater reach and appeal for your brand while strengthening your connection with your audience.

Fotobrinde - Instant Printing

With Fotobrinde, attendees at any event can have their photos printed on the spot in no time. A hit at promotional activities, tributes, and corporate parties, Fotobrinde serves as a powerful tool to enhance your company's brand and amplify the impact of your event's message. Thanks to our professional setup, we ensure speed and quality, delivering printed images within minutes, even when a high volume of photos is requested. AGPNT-Audiovisual also enables on-site distribution, collects participant electronic mail information and automates the sharing of photos via email and social media, as well as online posting.

Digital retouching & 3D

Some projects require meticulous photo editing that goes beyond standard adjustments of light, brightness, and color. Our digital retouching team specializes in creating the perfect image tailored to each client's needs. In addition to enhancing photo composition and removing unwanted elements, we can even incorporate new elements into the scene. Our work allows for the fusion of photographs with 2D or 3D elements, enabling us to refine details and create effects that are impossible to capture during production. The result is an impeccable image, free of imperfections and of the highest quality, suitable for large-format printing.

Virtual tours, Giros & 360° videos

AGPNT Audivisual also specializes in video projects, 360° photos and virtual tours. From initial design to project completion, we offer a comprehensive solution for an immersive experience that can be showcased on social media, YouTube, or even designed for VR glasses with high-quality content. Our tailored services can be utilized at fairs, events, and a variety of marketing activities for your company, brand, or product.

On December 9 we will celebrate International Anti-Corruption Day

Streaming

Streaming has become an essential tool for companies aiming to connect with distant audiences. Our expertise allows us to create immersive experiences that engage viewers, tailored specifically to each broadcast. By bringing production directly to the event venue, we ensure authentic capture and seamless real-time delivery. Our solutions incorporate interactive features such as live chats, polls and audience participation to foster genuine engagement. We guarantee fast and smooth execution, maintaining the event's flow while ensuring high-quality broadcasting.

Portraits for professionals

Professional portraits are crucial for communicating a company's identity and for the professionals who represent it in the market. Recognizing this importance, AGPNT-Audiovisual specializes in producing high-quality images tailored for the corporate sector, continuously investing in excellence. To achieve the best results, we bring all necessary equipment directly to each client's location. This approach allows us to capture authentic workplace images, which are essential for creating compositions that convey both aesthetic appeal and the credibility of the subject and their company. We are committed to executing this work quickly and efficiently, respecting the workspace and the schedules of the executives involved, ensuring that the company's routine remains undisturbed. By doing so, we help our clients strengthen their institutional image and communicate their message clearly and impactfully.

Our values & commitment

Agility

The ability to create, communicate and execute plans with objectivity and effectiveness includes keen attention to changes in direction and the agility to adapt to new scenarios.

Assertiveness

Clearly articulating our position involves objectively affirming principles and outlining possibilities for safe production, all while maintaining a strong focus on the desired outcomes of the project.

Creativity

To achieve distinctive results driven by talent and effort, we leverage our creativity to develop innovative solutions, whether redefining project concepts or innovating within established standards.

Credibility

A fundamental attribute in our professional and interpersonal relationships is the ability to express agreement or disagreement with calmness, respect, and honesty. This approach fosters collaboration and helps us work toward a common goal.

Punctuality

Meeting and respecting deadlines, schedules, contracts and commitments is not just a differentiator; it's the minimum standard we uphold. We prioritize consistency, integrity, accuracy, and precision in all our actions.

Quality

Essential and indisputable attribute in our structure, process or developed projects, distinctive feature in what is produced by us and must be positively associated with our personality.

Work

Productive and creative professional activity, as a team, where we dedicate our skills to create differentiated results; We are not satisfied with idealized standards, exceeding expectations and creating solutions that make a difference for companies is our passion.

Our commitment

By converting data and insights into compelling visual content, businesses can enhance communication, foster understanding, and drive growth. Visual representations make complex information more accessible, allowing stakeholders to grasp key concepts quickly and make informed decisions. This approach not only supports strategic initiatives but also engages audiences, facilitating stronger connections and promoting business evolution.
